

SQL Interview Questions – Day 2

5 SQL interview questions with simple answers

1. What is a Foreign Key?

Simple Answer:

A Foreign Key is a column that connects one table with another table. It usually refers to the Primary Key of another table.

It is used to maintain a relationship between tables and prevent invalid data relationships.

2. What is the difference between INNER JOIN and LEFT JOIN?

Simple Answer:

INNER JOIN returns only the matching records from both tables.

LEFT JOIN returns all records from the left table and the matching records from the right table. If there is no match, the right-side columns contain NULL.

3. What is GROUP BY in SQL?

Simple Answer:

GROUP BY is used to group rows having the same value. It is commonly used with aggregate functions such as COUNT(), SUM(), AVG(), MAX(), and MIN().

4. What is a Subquery?

Simple Answer:

A subquery is a query written inside another SQL query.

The inner query provides a result that is used by the outer query.

5. What is the difference between UNION and UNION ALL?

Simple Answer:

Both UNION and UNION ALL are used to combine the results of two SELECT queries.

The difference is that UNION removes duplicate records, while UNION ALL keeps duplicate records.
